

SELECT within SELECT Tutorial

Language: English · 日本語 · 中文

This tutorial looks at how we can use SELECT statements within SELECT statements to perform more complex queries.

name	continent	area	population	gdp
Afghanistan	Asia	652230	25500100	20343000000
Albania	Europe	28748	2831741	12960000000
Algeria	Africa	2381741	37100000	188681000000
Andorra	Europe	468	78115	3712000000
Angola	Africa	1246700	20609294	100990000000
...				

Using nested SELECT

Summary

Contents [hide]
1 Bigger than Russia
2 Richer than UK
3 Neighbours of Argentina and Australia
4 Between Canada and Poland
5 Percentages of Germany
6 Bigger than every country in Europe
7 Largest in each continent
8 First country of each continent (alphabetically)
9 Difficult Questions That Utilize Techniques Not Covered in Prior Sections

Bigger than Russia

1. 🤨

List each country name where the population is larger than that of 'Russia'.

world(name, continent, area, population, gdp)

```
SELECT name FROM world
WHERE population >
  (SELECT population FROM world
   WHERE name='Russia')
```

Submit SQL

Restore default

Correct answer

name
Bangladesh
Brazil
China
India
Indonesia
Nigeria
Pakistan
United States

sqlzoo select in select 1

Richer than UK

2. 🤨

Show the countries in Europe with a per capita GDP greater than 'United Kingdom'.

Per Capita GDP

```
SELECT name FROM world
WHERE continent in ('Europe') and (gdp/population) >
  (SELECT (gdp/population) FROM world
   WHERE name='United Kingdom')
```

Submit SQL

Restore default

Correct answer

name
Andorra
Austria
Belgium
Denmark
Finland
France
Germany
Iceland

sqlzoo select in select 2

Neighbours of Argentina and Australia

3. 🤨

List the name and continent of countries in the continents containing either Argentina or Australia. Order by name of the country.

```
SELECT name, continent FROM world
WHERE continent in ((SELECT continent FROM world
  WHERE name='Argentina' or name='Australia'))
order by name
```

Submit SQL

Restore default

Correct answer

name	continent
Argentina	South America
Australia	Oceania
Bolivia	South America
Brazil	South America
Chile	South America
Colombia	South America
Ecuador	South America
Ethiopia	Oceania

Between Canada and Poland

4. 🤨

Which country has a population that is more than Canada but less than Poland? Show the name and the population.

```
SELECT name, population FROM world
WHERE population > (SELECT population FROM world
  WHERE name='Canada') and population < (SELECT population FROM world
  WHERE name='Poland')
```

Submit SQL

Restore default

Correct answer

name	population
Iraq	36004552
Sudan	37289406

Percentages of Germany

5. 🤨

Germany (population 80 million) has the largest population of the countries in Europe. Austria (population 8.5 million) has 11% of the population of Germany.

Show the name and the population of each country in Europe. Show the population as a percentage of the population of Germany.

Decimal places

Percent symbol %

```
SELECT name, CONCAT(ROUND(population/(SELECT population FROM world
  WHERE name = 'Germany')*100,0), '%') FROM world
WHERE continent = 'Europe'
```

Submit SQL

Restore default

Lithuania	4%
Luxembourg	1%
Macedonia	3%
Malta	1%
Moldova	4%
Monaco	0%
Montenegro	1%
Netherlands	21%
Norway	6%
Poland	48%
Portugal	13%
Romania	25%

sqlzoo select in select 5

To get a well rounded view of the important features of SQL you should move on to the next tutorial concerning aggregates.

To gain an absurdly detailed view of one insignificant feature of the language, read on.

We can use the word 'ALL' to allow >= or > or < or <= to act over a list. For example, you can find the largest country in the world, by population with this query:

```
SELECT name
FROM world
WHERE population >= ALL(SELECT population
  FROM world
  WHERE population>0)
```

You need the condition **population>0** in the sub-query as some countries have **null** for population.

Bigger than every country in Europe

6. 🤨

Which countries have a GDP greater than every country in Europe? [Give the name only.] (Some countries may have NULL gdp values)

```
SELECT name FROM world
WHERE gdp > ALL(SELECT gdp FROM world
  WHERE continent = 'Europe' AND gdp>0)
```

Submit SQL

Restore default

Correct answer

name
China
Japan
United States

We can refer to values in the outer SELECT within the inner SELECT. We can name the tables so that we can tell the difference between the inner and outer versions.

Largest in each continent

7. 🤨

Find the largest country (by area) in each continent, show the continent, the name and the area:

```
SELECT continent, name, area FROM world x
WHERE area >= ALL
  (SELECT area FROM world y
   WHERE y.continent=x.continent
   AND area>0);
```

Submit SQL

Restore default

The above example is known as a **correlated** or **synchronized** sub-query.

Using correlated subqueries

Correct answer

continent	name	area
Africa	Algeria	2381741
Oceania	Australia	7692024
South America	Brazil	8515767
North America	Canada	9984670
Asia	China	9596961
Caribbean	Cuba	109884
Europe	Kazakhstan	2724900
Europe	Russia	4349529

First country of each continent (alphabetically)

8. 🤨

List each continent and the name of the country that comes first alphabetically.

```
SELECT continent, name FROM world x
WHERE name <= ALL (SELECT name FROM world y
  WHERE x.continent = y.continent
  ORDER BY name);
```

Submit SQL

Restore default

Correct answer

continent	name
Africa	Algeria
Asia	Afghanistan
Caribbean	Antigua and Barbuda
Eurasia	Armenia
Europe	Albania
North America	Belize
Oceania	Australia
South America	Argentina

Difficult Questions That Utilize Techniques Not Covered In Prior Sections

9. 🤨

Find the continents where all countries have a population <= 25000000. Then find the names of the countries associated with these continents. Show name, continent and population.

```
SELECT name, continent, population FROM world x
WHERE name <= ALL (SELECT name FROM world y
  WHERE x.continent = y.continent
  AND x.name <> y.name);
```

Submit SQL

Restore default

Correct answer

name	continent	population
Antigua and Barbuda	Caribbean	86295
Australia	Oceania	23545500
Bahamas	Caribbean	351461
Barbados	Caribbean	285000
Cuba	Caribbean	11167325
Dominica	Caribbean	71293
Dominican Republic	Caribbean	9445281
Ethiopia	Oceania	85000000

10. 🤨

Some countries have populations more than three times that of any of their neighbours (in the same continent). Give the countries and continents.

```
SELECT name, continent FROM world x
WHERE population >= ALL((SELECT 3*(population) FROM world y
  WHERE x.continent = y.continent
  AND x.name <> y.name));
```

Submit SQL

Restore default

Correct answer

name	continent
Australia	Oceania
Brazil	South America
Russia	Eurasia

Nested SELECT Quiz
